- **Databases:** SQL Server Database
- **Tools & Platforms:** Git, JIRA, Azure DevOps, WordPress, Windows OS

PROFESSIONAL EXPERIENCE

Chandigarh University (Corporate Department)

Kharar, Punjab, India

Software Engineer

August 2022 – Present

- Designed, developed, and maintained software applications utilizing the .NET framework.
- Built and maintained the CUCET (Chandigarh University Common Entrance Test) project, an ASP.Net Web Application.
- Developed the CUIMS (Chandigarh University Information Management System) using ASP.NET (C#) and DOT NET Core API.
- Created the CUDMS (Chandigarh University Desktop Management System) for account management utilizing WPF Application (XAML).
- Collaborated directly with stakeholders to gather and analyze software requirements.
- Designed and optimized database schemas, while implementing stored procedures, functions, and triggers in SQL Server databases.
- Participated in agile/scrum processes, including daily stand-ups, managing tasks in Azure DevOps, and maintaining code in Git repositories.
- Worked closely with front-end developers, designers, and QA teams to resolve bugs and optimize software performance.

GiniLytics IT Solutions

Sahibzada Ajit Singh Nagar, Punjab, India

Dot NET Developer

November 2020 – July 2022

- Developed WPF projects utilizing the .NET framework (MVVM pattern) for a US client in the entertainment device automation industry.
- Utilized XAML for front-end architecture and C# for back-end logic.
- Built a multi-division theater Windows application to track and manage theater motors, shows, and axis statuses using graphs and visualizers.
- Integrated applications with the Flyhouse API (.Net core API) and actively contributed to API development.
